

Generate design options for explosive articles

Overview

This standard covers the competences you need to generate design options for explosive articles in accordance with approved procedures and practices.

You will be required to demonstrate that you can confirm your understanding of the design requirements. Identifying and develop design options, in sufficient detail to enable evaluation in accordance with approved procedures and practices.

This activity is likely to be undertaken by someone whose work role involves Weapons, Ordnance, Munitions or Explosives work activities. This includes people working as design managers and development managers.

Generate design options for explosive articles

Performance criteria

- You must be able to:*
- P1 work safely at all times, complying with health and safety, environmental and other relevant regulations, legislation and guidelines
 - P2 confirm your understanding of the design requirements
 - P3 deal with problems relating to the design requirements
 - P4 identify and develop design options, in sufficient detail to enable evaluation
 - P5 prepare costings and timescale, in accordance with the specification
 - P6 document all generated design options
 - P7 present your findings in the correct format
 - P8 maintain the requirements of confidentiality at all times

Generate design options for explosive articles

Knowledge and understanding

- You need to know and understand:*
- K1 the health, safety and environmental and other statutory legislation, regulations and safe working practices and procedures governing explosives and their implications for your area of work
 - K2 the relevance of personal protective equipment (PPE)
 - K3 the nature, characteristics, hazards and risks of the explosive substances and/or articles
 - K4 the actions to be taken in response to an unplanned event
 - K5 the required functioning of the explosive substance or article
 - K6 current thinking within your own specialism
 - K7 information sources and document systems
 - K8 the requirements of the structure and content of the design specification and the factors that may impact on your design
 - K9 communication techniques
 - K10 reporting lines
 - K11 your own level of authority and that of others you work with
 - K12 the requirements of confidentiality

Generate design options for explosive articles

Scope/range

1. Information sources: informal; internal specifications; external publications
2. People: your manager; the customer
3. Format: verbal; written

Generate design options for explosive articles

Developed by	Cogent
Version Number	2
Date Approved	November 2017
Indicative Review Date	November 2020
Validity	Current
Status	Original
Originating Organisation	SEMTA
Original URN	ESA1.21
Relevant Occupations	Science and mathematics Science; Science; Engineering; Science and Engineering Technicians; Process, Plant and Machine Operatives
Suite	Explosive Substances and Articles
Keywords	Generate, design, explosive articles, health and safety, statutory regulations
